

Company Profile 2021.

Introduction Triconser Group of Companies

Triconser Group of Companies is an international drilling service company operating worldwide with offices in The Netherlands, Spain, Switzerland, Brazil, Panama, Kuwait, Oman, UAE and Turkey.

Our Group is a forward-thinking organization who tries to make differences.

We believe our pioneering spirit will deliver superior solutions for our clients. We are dynamic, brave and purposeful, breaking through barriers and charting new ground, genuinely making a difference but always with a conscience. We aim to create opportunities where others have not, we search for sustainable solutions where others cannot. We develop revenue-generating solutions to common and complex industry challenges.

As an EPC contractor with a fast-growing worldwide client base, specialized in a full range of drilling services. Triconser Group of Companies provides tailor made drilling teams, full overhaul, spare parts and certifications for your drilling equipment's. Our staff is motivated, well trained, certified and ready for any job.

Your problem is our GOAL!

► **TRICONSER**

CEO's Speech

The idea behind Triconser Group of Companies leads back more than 20 years ago were a couple of Dutch no-nonsense sailors who had already earned their spurs in the offshore, decided to work together worldwide to carry out the most complex assignments, alone or in a team.

All educated and trained by experiences with high pressure drilling in the most complex form near the coast of the Netherlands and England in the dreaded North Sea.

That sense of invincible seamanship is still the drive that all our employees radiate. Wherever they are. Whatever problem needs to be solved.

Now that Triconser Group of Companies has grown into a globally operating company with a large database of specialists for every job, we no longer see each other every day. But the feeling remains of that group of friends who see every problem of the customer as a challenge. That is what Triconser Group of Companies still stands for: Your problem is our challenge!

Richard Fokker, CEO

- ❑ Managing and hands on drilling rig activities on Drill ships Semi-submersible & jack up drilling rigs.
- ❑ Engineering.
- ❑ Operating.
- ❑ Maintenance.
- ❑ Overhauls.
- ❑ Factory Acceptance Test Witnessing.
- ❑ Quality insurance as third-party witness.
- ❑ Preservation of drilling rigs for prior being stacked.
- ❑ Returning drilling rigs back into operation.
- ❑ Equipment repairs.
- ❑ Inspections.
- ❑ Engineering, Design and Construction Services.
- ❑ Technical Manpower Services.
- ❑ Security Services for Oil and Gas Assets.
- ❑ Sourcing and supplying parts and components. New and used.

Solutions

In cooperation with our worldwide network of specialists Triconser Group of Companies is able to manage the following services

- ❑ Oil and Gas Exploration and Development
- ❑ Oilfield Services
- ❑ Drilling and work over fluid services
- ❑ Environmental services
- ❑ Well testing and early production facility Engineering, Design and Construction Services
- ❑ Technical Manpower Services for well testing
- ❑ Security Services for Oil and Gas Assets

Oil & Gas Exploration & Development

The partners of Triconser Group of Companies have many years of experience in Energy development and discovery, and a vast network of associates, providing following services:

- ❑ Reservoir studies - Field studies
- ❑ Field development plans
- ❑ Work programs and operations management
- ❑ Sourcing and supplying parts and components
- ❑ Overhauling, repair and maintenance
- ❑ Offshore jack-up and Semi-sub operations
- ❑ Financing and finance planning

Drilling & completion fluid services

- ☐ Multilateral drilling
- ☐ HTHP drilling and evaluation
- ☐ Completion fluid filtration
- ☐ Reconditioning of drilling and completion fluids
- ☐ Fluid analysis

Environmental services

- ☐ Feasibility studies
- ☐ Site assessment
- ☐ Oil waste management
- ☐ Soil remediation
- ☐ Vessel and production tank cleaning

Well testing & early production facilities

- ❑ Production testing
- ❑ Well cleanup
- ❑ Extended well testing
- ❑ Data acquisition and interpretation
- ❑ Fluid samples and analysis
- ❑ Design and manufacturing capabilities
- ❑ Build-Operate-Transfer
- ❑ Operations and maintenance
- ❑ Flexible commercial models

Cased hole logging services

- ❑ Gamma ray/CCL
- ❑ Radial cement bond tools (RBT)
- ❑ Multifinger imaging tool (MIT) and magnetic thickness tool (MTT)
- ❑ Pulse neutron neutron (PNN) tool
- ❑ Production logging tool (PLT)

Track Record

- ❑ Supervised rig acceptance and prepared the drill ship ODN 1 for contract with Petrobras
- ❑ Changed out complete Aker CMC on location (first ever and only) on the ODN 1
- ❑ Supervised rig acceptance and prepared the drill ship ODN 2 for contract with Petrobras.
- ❑ Prepared drill ship Norbe 8 for contract with new client “TOTAL”
- ❑ Installed Acoustic BOP control system and auto shear system upgrades on the BOP system on Norbe 8.
- ❑ Supervised and managed 5 yearly recertification of all well control equipment Norbe 8 on location.
- ❑ Supervised and managed 5 yearly recertification of all well control equipment Norbe 9 on location
- ❑ Supervised and managed completion of construction, rig acceptance and prepared the semi-submersible DELBA 3 for contract with Petrobras.
- ❑ Supervised and managed rig modifications and recertification Semi-Submersible drilling rig ODN Tay former Stena Tay.
- ❑ Developed and installed new BOP control system on drill ship Noble Roger Eason.
- ❑ Developed and Installed Cyber chair drilling control systems and replacement of complete drilling package on Jack up Rig Noble Al White.
- ❑ BOP recovery on Semi-Submersible ODN Tay.
- ❑ Well examinations for geothermal projects in The Netherlands, including wells CAL-GT-01,CAL-GT-02,CAL-GT-03,HEK-GT-01,HEK_GT-02
- ❑ Well examination schemes for Dutch based drilling company
- ❑ North Sea HSE cases for all drilling units of a drilling contractor
